about us.

The **Student Initiated Courses (STICs)** program at The University of Maryland gives students the opportunity to design, develop, and teach courses on a variety of subjects under the guidance of a faculty advisor. We are a student-run experimental program with support from the Academy for Innovation and Entrepreneurship out of the Office of the Provost. Initial schools and departments at UMD who have partnered with STICs include Computer Science, Business and Management, Mathematics, Music, Environmental Science, and more to come.

apply now.

Facilitating a STIC is one of the most rewarding learning opportunities available to undergrads. Any student interested in teaching an undergraduate course can apply to teach an official 1-2 credit class. You and your faculty advisor come up with the course topic, design all the material and assignments, and decide how to deliver the content to the class. Visit [apply now](#) to get started.
